AVANTAJE

Imbunatateste porii mari, cicatricile de acnee si pielea cazuta cu stratul de collagen distrus din derm, radiind cu precizie energie termica de inalta frecventa catre stratul dermic distrus, fara a deteriora epiderma.

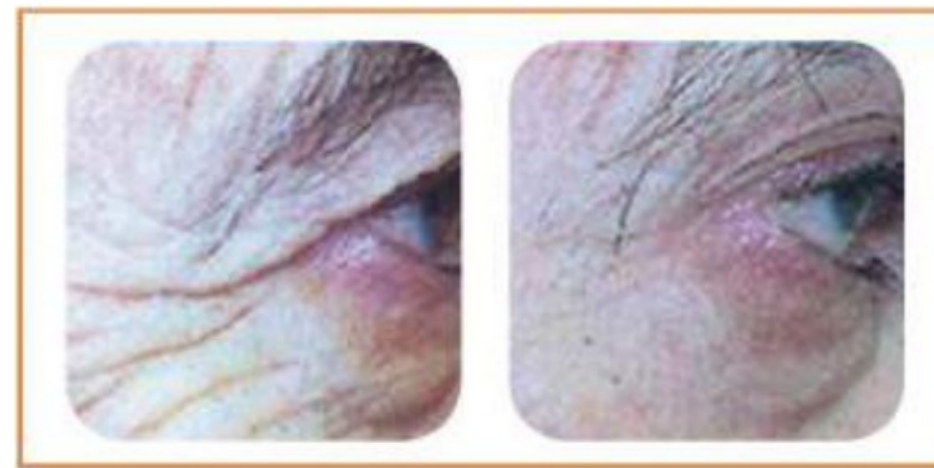

● **Vindeca fibroblastele stimulate** ● **Creste producerea de collagen** ● **Remodeleaza dermul**

Radiind caldura de inalta frecventa prin microacele izolate, contracta, coaguleaza si necrotizeaza stratul de collagen din derm. Prin procesul natural de vindecare se poate realiza remodelarea dermica.
